

MEMORANDUM

To: Monica Tonel, Deputy Project Officer
START-2 Contract No. 68-S0-01-02, Work Assignment No. W-02-002
(Site Assessment), EPA Region 10

From: Greg Stuesse, Site Assessment Project Manager, Weston Solutions, Inc.

Date: 13 July 2005

Site Name: Musick Mine and Helena Mine

EPA CERCLIS
ID No.: ORN001002521 Musick Mine
ORN001002517 Helena Mine

TDD No.: 03-11-0003-D

Activity Type: Combined Preliminary Assessment/Site Inspection

During the completion of the Combined Preliminary Assessment/Site Inspection report a typographical error occurred in a portion of Section 5.1 (Analytical Results Evaluation Criteria) that describes significant/elevated concentrations in three bullets. In the report the word "and" was omitted from the end of the first bullet and the word "or" was omitted from the end of the second bullet. The revised language is shown below.

For the purposes of this report, significant/elevated concentrations are those concentrations that are:

- Equal to or greater than the sample's SQL.
- Equal to or greater than the background sample's SQL when the background concentration is not detected (or is less than the detection limits).
- At least three times greater than the background concentration when the background concentration equals or exceeds the detection limits.

Through interviews with the authors of the report and reviews of the data tables and reports it was determined that the data had been evaluated in accordance with the corrected language as described above and that the conclusions of the report are correct.
